Installation

REQUIREMENTS

- WooCommerce 3.7.0 or greater installed and activated.
- Instant Design Tool.

(If you do not already have an Instant Design Tool, go to https://www.instantdesigntool.com to create one).

FROM YOUR WORDPRESS DASHBOARD

To begin, click on the Plugins link, then click Add New

Search for Instant Design Tool. Click the **Install Now** button:

INSTANT DESIGN TOOL	Instant Design Tool Install Now Connect WooCommerce to your Instant Design Tool. Enable your customers to create and order their By Instant Design Tool	
☆☆☆☆☆ (0) 10+ Active Installations	Last Updated: 2 weeks ago Compatible with your version of WordPress	

Next, click the Activate button.

ONCE ACTIVATED

After activating, click on the **WooCommerce** link, then click **Settings.**

Next, click the **IDT Settings** tab. Copy your IDT Connect code* from the management panel of your design tool and paste this into the **IDT Connect code** field.

		Yo	u can generate	this code in your editor n	nanagemen	t page. The plug	in will not work	without this code.

*If you do not have an IDT Connect code yet, go to section "Generate IDT Connect code".

Generating IDT Connect code

Before you can generate an IDT Connect code you need to connect the design tool to your own webshop. If you have already moved the design tool to your own subdomain you can skip to the section "GETTING THE IDT CONNECT CODE", to see how and where you retrieve your connect code.

CREATE SUBDOMAIN

To host the design tool from your own website, you need to create a subdomain.

Go to your hosting provider and create a subdomain for your webshop. Let's call it designer.<yourwebsite>.com. You can name it whatever you want, but for this tutorial we will call the subdomain "designer". Do not forget to save.

Next, click on settings for your newly created subdomain. Look for the DNS settings and find the 'CNAME-record'. Click on edit and fill in the following: "app.instantdesigntool.io". (sometimes your hosting provider requires you to add a dot (.) to the end making it "app.instantdesigntool.io."). Hit save.

*If you don't know how to do any of this, please contact your website provider.

GENERATE IDT CONNECT CODE

Now that you have created the subdomain to host the design tool, let us request the move.

Go to the management panel of your design tool. (https://<your-design-tool>.instantdesigntool.com/manage).

Login with the username and password you chose on your first guide into the management panel. If you do not remember your password, hit 'forgot password'.

Next, click on the **Domain change** link in the side menu.

You will be prompted with the webshop integration.

P Change domain name
Great to see you're about to take the next step! We'll help you set up the DNS records needed to move your design tool. If you don't know what DNS is or don't have access to a DNS control panel, please contact your web builder or IT dept.
Webshop integration
Before we proceed, please let us know how you intend to use the design tool. At the moment, it's backed by the included cart and order backoffice. Do you have your own webshop system you'd like to connect it to instead? If you aren't sure, feel free to contact us for advice.

- choose -

From the dropdown menu choose "Yes, connect to our WooCommerce shop".

	- choose -	·
	- choose - No, just change the domain]
l	Yes, connect to our WooCommerce shop	
L	Yes, we'll code a custom integration	Л

At the bottom of the page fill in the subdomain we have created in the previous step (designer.<your-website>.com)*.

Design tool domain

designer.<your-website>.com

\land Request move

*Replace <your-website> with your own domain name.

Next, click Request move. You will be prompted with a dialog box, click OK.

You should see the following message.

✓ Domain change request received

It could take up to a business day for the changes to take effect. Once the changes have taken effect, you will receive the following email.

Click on the panel link in the mail.

GETTING THE IDT CONNECT CODE

Login into your management panel.

Click the **Plugins** link in the menu.
